

I Table of Contents

I	Table of Contents	1
1	Introduction.....	1
2	Systematic Approach to Perceived Quality Research.....	3
2.1	Quality and Customer Satisfaction	3
2.1.1	Development of the Objective Quality Term.....	3
2.1.2	Development of the Subjective Quality Term	5
2.1.3	Combination of Objective and Subjective Quality.....	6
2.2	Problem Description and Project Borders	7
2.3	Research Question.....	10
2.4	Research Methodology	11
2.5	Structure of the Thesis	12
3	State of the Art.....	15
3.1	Human Perception Principles	15
3.2	Haptic and Tactile Sense	17
3.2.1	Haptic and Tactile Sensory Principles.....	17
3.2.2	Contact Temperature	20
3.3	Metrology on Haptics and Tactility	22
3.3.1	Tactile Reference Frame.....	22
3.3.2	Hardness, Softness and Recovery Rate	23
3.3.3	Surface Friction	24
3.3.4	Haptic and Tactile Topography	25
3.3.5	Contact Temperature	30
3.4	Visual Sense	31
3.4.1	Sensory Principles of Color Perception	31
3.4.2	Color Perception Chain and Tristimulus Values.....	32
3.4.3	Color Spaces.....	35
3.5	Visual Metrology.....	37
3.5.1	Color Measurement.....	37
3.5.2	Color Differences and Color Tolerancing	39
3.5.3	Metamerism	40
3.5.4	Gloss.....	41
3.5.5	Visual Topography	42
3.6	Examples of Current Perceived Quality Assessment Processes	44
3.6.1	Product Audit Approach	44
3.6.2	Customer Clinic Approaches.....	45
3.6.3	Customer Surveys.....	46
3.6.4	Emotional Surveys – Kansei and Emocard	47
3.7	Current Research and Methodologies on Perceived Quality.....	49

3.7.1	Approaches to Perceived Quality	49
3.7.2	Defining Perceived Quality Data Driven	51
3.7.3	Perceived Quality Methodologies	53
3.7.4	Specification of Perceived Quality	55
3.8	Examples of Systems and Components Influencing Perceived Quality	55
3.8.1	Interior Surfaces	55
3.8.2	Switches	58
3.8.3	Air Registers	59
3.9	Perceived Harmony	60
3.10	Quality- and Statistical Methods	62
3.10.1	6 Sigma	62
3.10.2	Correlation and Regression	64
3.10.3	Principal Component Analysis	66
3.10.4	Multidimensional Scaling	67
4	Solution Approaches and Methodology Synthesis	69
4.1	Requirements	69
4.2	Potential Solutions	70
4.3	Gap Analysis and Decision Matrix	75
4.4	Toolbox Methodology	75
5	Perceived Quality Toolbox	77
5.1	Toolbox Set-Up	77
5.2	Robotized Unit for Tactility and Haptics (RUTH)	78
5.2.1	RUTH Set-up and General Specification	78
5.2.2	Fringe Projection Microscope	81
5.2.3	In Vehicle Measurements	82
5.3	System Enhancements	83
5.3.1	Precision Improvements	83
5.3.2	Efficiency Improvements	85
5.4	Gauge R&R Investigations	86
5.4.1	Gage R&R Robotized Unit for Tactility and Haptics (RUTH)	87
5.4.2	Gage R&R Contact Temperature	88
5.4.3	Gauge R&R Fringe Projection Microscope GFM MicroCad	88
5.5	Haptic and Tactile Parameters	90
5.5.1	Hardness, Softness and Elasticity	90
5.5.2	Friction	93
5.5.3	Roughness	96
5.5.4	Operational Efforts	102
5.5.5	Deflection	102
5.6	Human Perceived Contact Temperature	102
5.7	Visual Parameters	106
5.7.1	Color	106
5.7.2	Gloss	106

5.7.3	Topography	107
5.7.4	Gaps, Flushness, Burrs and Split Lines	107
5.8	Measuring Vehicle Systems and Components	109
5.8.1	Interior Surfaces	109
5.8.2	Switches	110
5.8.3	Air Registers	111
6	Validation Projects	115
6.1	Definition of Company Standards	115
6.1.1	Steering Wheel	115
6.1.2	Armrest	117
6.2	Examples on Rotary Control Devices	117
6.3	Haptic Evaluation of a New Door Trim Material	118
6.3.1	Friction Measurements by means of the Haptic Buck	119
6.3.2	Friction measurements by means of RUTH	120
6.3.3	Conclusion	121
6.4	Zoom Project	121
6.4.1	Subjective Results	122
6.4.2	Generation of Transfer Functions	123
6.4.3	Conclusion	130
6.5	Kansei Study	131
6.5.1	Semantic Differentials	131
6.5.2	Determination of Transfer Functions	134
6.5.3	Conclusion	137
6.6	Perceived Quality Correlation Clinic	138
6.6.1	Subjective Evaluation	138
6.6.2	Measured Data and Determination of Transfer Functions	144
6.6.3	Conclusion	150
7	Discussion	151
7.1	Answering the Research Questions	151
7.2	Conclusions	153
8	Outlook	155
II	Glossary of Abbreviations and Symbols	157
III	Literature Reference	163
IV	Figures and Tables	173
V	Attachments	177
